Haute cuisine tips & tricks
How to plate food like a master chef

A furtively reverent look upon the dish served is a sign you hit the bull’s eye: even before the fork glides toward the plate. It really is true that you only get one chance to make a first impression.

The fare you serve should therefore be at least as pleasing to the eye as it is delicious. The art of garnishing has only one rule: less is more. Incorporate that into your culinary creation, and you are already half-way to the professional look of your dishes. Then, follow six simple laws of serving haute cuisine food: keep it clean and shiny, white is elegant, use contrast colours, use something innovative instead of a plate, stack the ingredients up and serve them in an odd numbers. Voilà – the plate is ready to charm your guests.

- 1 teaspoon fresh ginger
- 2 cloves garlic, chopped
